

## **SHARK ADAPTATIONS ACTIVITY**

**Draw a line from the part of the shark to its function**

### **PART OF THE SHARK**

**Gills**

**Ampullae of  
Lorenzini**

**Spiracle**

**Shiny reflective  
layer behind eyes**

**Teeth**

**Cartilage**

**Denticles  
(hint: armour!)**

### **FUNCTION**

**Sharks may use these to  
examine an unfamiliar object**

**Makes the shark lighter and  
more flexible**

**Gives the shark a strong  
outer skin**

**How the shark breaths –  
takes oxygen from the water**

**Allows skates + rays to  
breathe when lying on the  
seafloor**

**Helps the shark to see in  
low light conditions**

**Organs that sense electrical  
currents for hunting +  
migrations**
